

Why Israel Why Now

The *Nation of Israel* was reestablished in the Year 1948 this *Biblical* return of the *Hebrew* people to their *God* given homeland was not celebrated by all the nations of the world. From the very start the continued existence of the *Nation of Israel* was threatened by acts of war and violence. The safety and security of all the people who call Israel home has been the overarching goal of all who hold in high esteem the principals of *Freedom Democracy* and *Liberty*.

The United States of America has been and will remain dedicated to an alliance and friendship with the *Nation of Israel*. A deep commitment to common values and interests binds *The Nation of Israel* to its partner and ally *The United States of America*.

Today our two nations are working together more than ever in the arenas of security and energy technology. The *American* and *Israeli* governments along with their respective business sectors are collaborating to promote energy solutions that will ensure both countries have long term "*Energy Security*". This important work helps to reduce the dangerous dependence on foreign petroleum energy sources, and by developing new resources it will strengthen the "*Energy Independence*" of *The United States* and *Israel*.

Throughout the *Nation of Israel's* history Israeli doctors' scientists and researchers have produced countless medical advances. Whether achieved through independent research or joint projects with *The United States* the medical discoveries made in *Israel* are improving the lives of millions of *Americans* and others around the world. By encouraging advanced research and development Israel has produced treatments for ailments ranging from paralysis to breast cancer and diabetes. Doctors throughout *Israel* are working with colleagues in *The United States* and around the world in the quest to cure cancer. The *Israel Cancer Center* has collaborated with international foundations such as *Susan G. Komen for the Cure* and *Estee Lauder's Pink "Ribbon Campaign"* to increase cancer awareness and provided medical support to patients in need.

The Nation of Israel is the one nation in the middle east that promotes a democratic representative type of government that includes all ethnic regional peoples. If peace is to ever be found in this part of the world *The Nation of Israel* must be part of the solution. Removing Israel from the equation and it will be like removing the lid of a pressure cooker that is under full pressure. A "*Pro-Israel*" commitment by our country is the best way to help bring a real and lasting peace to Israel and her non-Hebrew neighbors. *The United States of America's* strong military and financial support for *The Nation of Israel* is our best investment in world peace. Now is not the time to appear weak or show a lack of commitment to the defense of Israel when the going gets tenuous and choices are not easy to make, we must stand united and strong with our one true ally in the fight for democracy.

We have very few true friends in the middle east, we cannot afford to jeopardize our relationship with Israel over political short-lived policies that do not serve our common interests. Despite our political leanings we must think long term about our commitment to the defense and support of *The Nation of Israel*.

Our children and grandchildren must live in the world we *Build* or --- *Destroy!*
